

TESLA

80

STORE LOCATIONS

We installed multiple features in 80 Tesla locations across the United States.

GEOGRAPHICALLY

NATIONWIDE

OVERNIGHT

COMPLETION AVERAGE

The time frame of 80 stores took place within 24 hours. The average installation time per store was around two hours.

TESLA

AREAS OF EXPERTISE

We were brought on to swap out SEG fabric graphics of all sizes. The sizes ranged from 4'x6' to 21'x8'. There were as few as two installations per location or as many as 18 per location. What separated us from others in our field of work were the relationships gained with many installers and our dedication to be on-call up to 24 hours for support and reporting.
